## PROFESSIONAL OVERVIEW

Full stack developer and BS Information Technology graduate who builds web and mobile apps end to end with React, React Native, Node.js, Firebase and Supabase. Led a capstone AI travel assistant as project manager and sole developer. Experienced in REST APIs, LLM integration and keeping running costs low.

## EXPERIENCE

**Full Stack Developer** | RvFit (Personal Project) OCT 2026 – PRESENT

- Building a fitness web app with Next.js, TypeScript, Tailwind CSS and Supabase (Auth, PostgreSQL, row-level security).
- Built a calorie and macro calculator, meal planner (about 180 foods), workout plans and progress tracking.
- Wrote 44 Vitest test files and a GitHub Actions CI pipeline (typecheck, lint, test, build); staging runs on Vercel.

**Freelance Full Stack Developer** | Dappertails, New Jersey (Remote) JUL 2026 – AUG 2026

- Built a call-assistant web app (React, Node.js) for real-time notes and lookups during customer phone calls.
- Added autocomplete search for dog breed names to remove spelling errors and speed up entry mid-call.
- Matched each breed to its coat type and company price automatically, replacing manual price lookups.
- Stored client profiles, call history and pet notes in a database; provide ongoing price and data updates.

**Project Manager & Full Stack Developer** | TravelMate AI Capstone, University of Cebu FEB 2026 – MAY 2026

- Led the capstone and solely built an AI voice travel assistant for web (React) and mobile (React Native, Expo).
- Designed a REST API with Node.js/Express on Firebase Cloud Functions, using Firestore, Auth and Cloud Messaging.
- Integrated the OpenAI API for the chatbot, Serper and Geoapify for place data, and Google Maps Platform (Places, Geocoding, Routes) as a fallback.
- Delivered voice mode with free speech-to-text and text-to-speech, plus itineraries, routing, weather and reminders.
- Cut API costs by switching to Gemini, local Ollama and free OpenStreetMap services so the app runs on free tiers.
- Secured user data with per-user Firestore rules, server-side token checks, rate limiting and sanitized AI output.

**Full Stack Engineer (OJT, 1,000 hours)** | MMB Network and Data Solutions, Cebu City AUG 2025 – JAN 2026

- Proposed and built an internal sales tracker and CRM dashboard for a system integrator and IT solutions provider.
- Developed it with React, Node.js and Firebase: secure login, sales transactions and a last-contact log for each client.
- Added month-by-month sales trend charts so management can see rising or falling sales at a glance.
- Deployed on Vercel for internal use only, limited to logged-in staff to protect private sales data.

## EDUCATION

**Bachelor of Science in Information Technology** | University of Cebu, Cebu City GRADUATED JUN 2026

## SKILLS

| | |
|---|---|
| **Programming** | JavaScript, TypeScript, HTML, CSS, SQL |
| **Frontend & Mobile** | React, Next.js, React Native (Expo), Vite, Tailwind CSS |
| **Backend & APIs** | Node.js, Express, REST APIs, Firebase Cloud Functions |
| **Data & Cloud** | Firestore, Supabase (PostgreSQL), Firebase Auth, Vercel |
| **AI & Integrations** | OpenAI API, Google Gemini, Ollama, Google Maps Platform, Geoapify, Serper, Web Speech API |
| **Tools** | Git, GitHub Actions, Vitest |
| **Languages** | English, Filipino, Cebuano |
